Lincoln County Prosecutor's Office is looking to fill the position of VICTIM-WITNESS COORDINATOR:

Must be 21 years of age and have a high school diploma or GED with at least five (5) years of experience in a professional office or legal related field, or victim advocacy experience. Equivalent combination of college education and experience may be substituted for years of work experience. Exposure to vicarious trauma is high, therefore individuals with specialized training in victim services will be given special consideration. A successful candidate must possess excellent organizational and interpersonal communication skills. A proven ability to establish and maintain effective working relationships with the public and co-workers is necessary. Must be able to work in a busy office environment with frequent deadline pressures. Excellent grammar, spelling, and keyboarding skills are required along with strong knowledge or Windows-based programs. Must effectively operate standard office machines and computers. Confidentiality is mandatory. Passing a criminal history background check is required. Competitive salary DOE.

Cover letter and resume should be mailed to the Lincoln County Prosecutor's Office at P.O. Box 874, Davenport, WA 99122 or email to todenrider@co.lincoln.wa.us no later than 4 p.m. December 23, 2019. Lincoln County is an equal opportunity employer.

**DAVENPORT - ODESSA - SPRAGUE
 MAKE YOUR VOICES HEARD!**

The Davenport Chamber of Commerce, the Odessa Chamber of Commerce and the City of Sprague are working on a community assessment survey that they hope will inform and inspire their decision-making and, hopefully, decision-making throughout in their communities. All residents of Davenport, Odessa and Sprague are invited to engage in the process and help drive the future of their communities!

Residents of all ages are invited to participate by taking the survey available at <http://avista.surveysby13ways.com/> between now and December 20

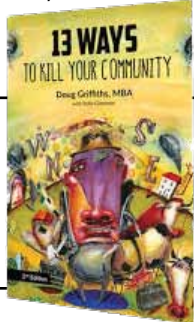

Please encourage friends, families and coworkers to take the survey, too! Done in partnership with Avista Utilities, the survey is built on a popular book titled "13 Ways to Kill Your Community" which looks at 13 ways that communities across the nation unintentionally limit growth and opportunity.

The surveys are anonymous and, once completed, the responses will be combined, analyzed, and turned into suggestions that will be shared with the public.

"Regardless of the situation, a community's future truly rests within its own populace and their desire to achieve success. It is just that simple."

Doug Griffiths

Introducing our newest team member!

Annamaria Ritt
 Annamaria Ritt was born in Rio de Janeiro, Brazil. She has worked as a Realtor in the Seattle area from 1995-2007 and took a break to raise her family. She now lives in Spokane and is excited to continue her career in Real Estate and help restore peoples faith in Realtors by providing honest, ethical representation with high quality service. Real Estate has been a large part of her life and although she loves construction and land development, she is very knowledgeable in all areas of real estate. She is fluent in English, Portuguese and Spanish. Annamaria provides the best service possible by listening closely to her clients needs and giving them her 100%. Her service area is Spokane and the surrounding communities.

LINCOLN HOSPITAL IS AMONG THE FIRST IN THE U.S. TO OFFER NEW WIDE-ANGLE 3D MAMMOGRAM FOR EARLIER CANCER DETECTION: NEW TECHNOLOGY ALSO FEATURES PERSONALIZED COMPRESSION FOR A MORE COMFORTABLE EXAM

Lincoln Hospital is advancing the fight against breast cancer by installing innovative technology designed to overcome barriers to detection and compliance with the purchase of the Siemens Mammomat Revelation (the Revelation). "We chose the Revelation because the wide-angle technology makes it easier to find even the smallest cancers earlier with greater accuracy," said Jean Reindeau, Imaging Supervisor for Lincoln Hospital. "We also see the system's personalized compression helping women overcome any fear they might have because the exam has been designed to be more comfortable."

The advantage of wide-angle, next-generation 3D mammography: The Revelation, from Siemens Medical Solutions USA Inc., is the next generation of 3D mammography (breast tomosynthesis) – the high quality technology you would find in Spokane, right here in our local community. With its unique wide 50-degree angle and the industry's highest depth resolution, the Revelation captures more detail for extremely high-quality 3D images that increase diagnostic confidence and enable earlier detection of even subtle lesions.

The Revelation is also the first mammography platform to provide automated breast density measurements at the point of examination. High breast density can increase the risk of developing cancer. Currently, breast density is estimated visually during the image reading process, usually after the patient leaves. With the Revelation, getting this information during the exam enables immediate and personalized risk assessment and allows Lincoln Hospital's imaging staff to provide supplemental imaging while the patient is in her exam.

The comfort of personalized compression
 Compression is key to getting an accurate mammogram. However, the associated discomfort and pain are key reasons why women avoid mammography exams. "It was important to us to consider any barrier that could stop a woman from getting the screening she needs," said Reindeau. With the mammography machine's Personalized Soft Compression, each woman gets exactly the right amount of compression for her breast type. The force is automatically adjusted for the greatest individual comfort without compromising any accuracy.

"We are thrilled to bring this technology to Lincoln County and surrounding areas," said Tyson Lacy, Chief Executive Officer for Lincoln Hospital and Clinics. "This system will enable our patients to access high quality images with an increased patient experience to make early detection possible. We are committed to continuing Lincoln County's legacy of fighting breast cancer."

The American College of Radiology and Society of Breast Imaging recommend women receive a mammogram every 12 months starting at age 40. Any patient under 40 years of age with a family history of breast cancer should talk with their healthcare provider to see if a mammogram should be considered.

"While self-breast-exams remain important to do, we now have improved technology to detect cancer earlier than a self-exam will detect any abnormalities," said Reindeau. "It's important to get screened every year because catching cancer early can save your life."
 To schedule a mammogram at Lincoln Hospital call 509-725-2975.

**Finally, mammograms
that aren't such a pain.**
