I don't even know where to begin. A simple thank you is just not enough. But here goes. . . Thank you to Creston EMTs, Davenport ER team on duty the morning of November 17 (you literally saved my life). Wish I knew all your names! A big thank you to everyone for all the prayers, well wishes, visits and food. You're all awesome! How blessed Brad and I are to live in this loving, caring community. I won't even try to mention names for fear of leaving someone out. Just know how much you are loved.

PS: You who know me know that "I DON'T FLY!" The helicopter ride was the worst part of the whole deal.

Hugs and Lots of Love

AVISTA HELPS CUSTOMERS TAKE SIMPLE STEPS TO MANAGE THEIR WINTER ENERGY COSTS: *Easy low-cost tips can reduce air drafts and heat loss during the cold weather months*

During the colder months, home heating is responsible for 40-60 percent of the charges on a customer's monthly energy bill. Just as they do every year when colder weather starts to set in, home heating systems across Avista's service territory are running more frequently and for longer periods of time. This increased activity means increased energy use, resulting in higher monthly energy bills.

Reducing the amount of time a heating system operates can help lower energy use. One of the most common drivers of increased heating system activity is a cold air draft. Air drafts are essentially air leaks and can be found in any age or type of home. Drafts cause warm air (and the energy used to generate it) to escape, decreasing customer comfort inside a home. Fireplace dampers and cracks in or around windows and doors are common sources of drafts. Customers can take simple steps to address these issues and help manage their energy costs.

- Install multi-use window plastic and rope caulk to keep cold air out and warm air in. Both items can be found at local hardware stores for as low \$3 and are easy to install, requiring no additional tools or hardware. The items are also easy to remove, making them excellent weatherization options for renters or for those in temporary housing situations.
- Add door sweeps and weather stripping around exterior facing doors to help stop cold air drafts.
- Close the damper on a fireplace, when it's not in use. This simple step can prevent 25% of the heat in a home from escaping out the chimney.
- Install energy efficient LEDs to use up to 80 percent less electricity while producing the same amount of light as older incandescent or CFL lightbulbs. This is especially effective during the winter as daylight decreases and relying on natural sun light to keep home interiors lit becomes difficult.
- Setting your heating thermostat at 68 degrees when you are home and reduce it a few degrees at night and when you are away.
- Using space heaters only in small, occupied areas for short periods of time and not using them as a main source of heating. They can be more costly to operate than other heat sources.

Your local Realtors® proudly serving eastern WA communities since 2003

Whether you're buying or selling, our highly trained & experienced Realtors® are here to guide you through the process smoothly.

Rick Sawyer: 509-660-0610 Jade Jahn: 509-721-1226

How would you decorate the present? Decorate this gift with crayons, markers, glitter - whatever you like (and maybe send us a photo of your finished work that we can share on our FB page)!

Thank you to the Edwall Men's Group

It was so nice to see the Christmas Card board decorated in the Edwall park, which included all names (free of charge). A special thank you to Bruce Cousins and Mike Bishop for making this happen.

~From two farmer Edwallites
